SCAMS ARE RUNNING RAMPANT!

USE THESE TIPS TO AVOID BECOMING THE NEXT VICTIM.

## S.L.A.M the Scam

Spot phishing emails by using the S.L.A.M Method!

### SENDER

Carefully analyze who the email is coming from

### LINKS

Hover over links, without clicking, to see where it may take you

### ATTACHMENTS

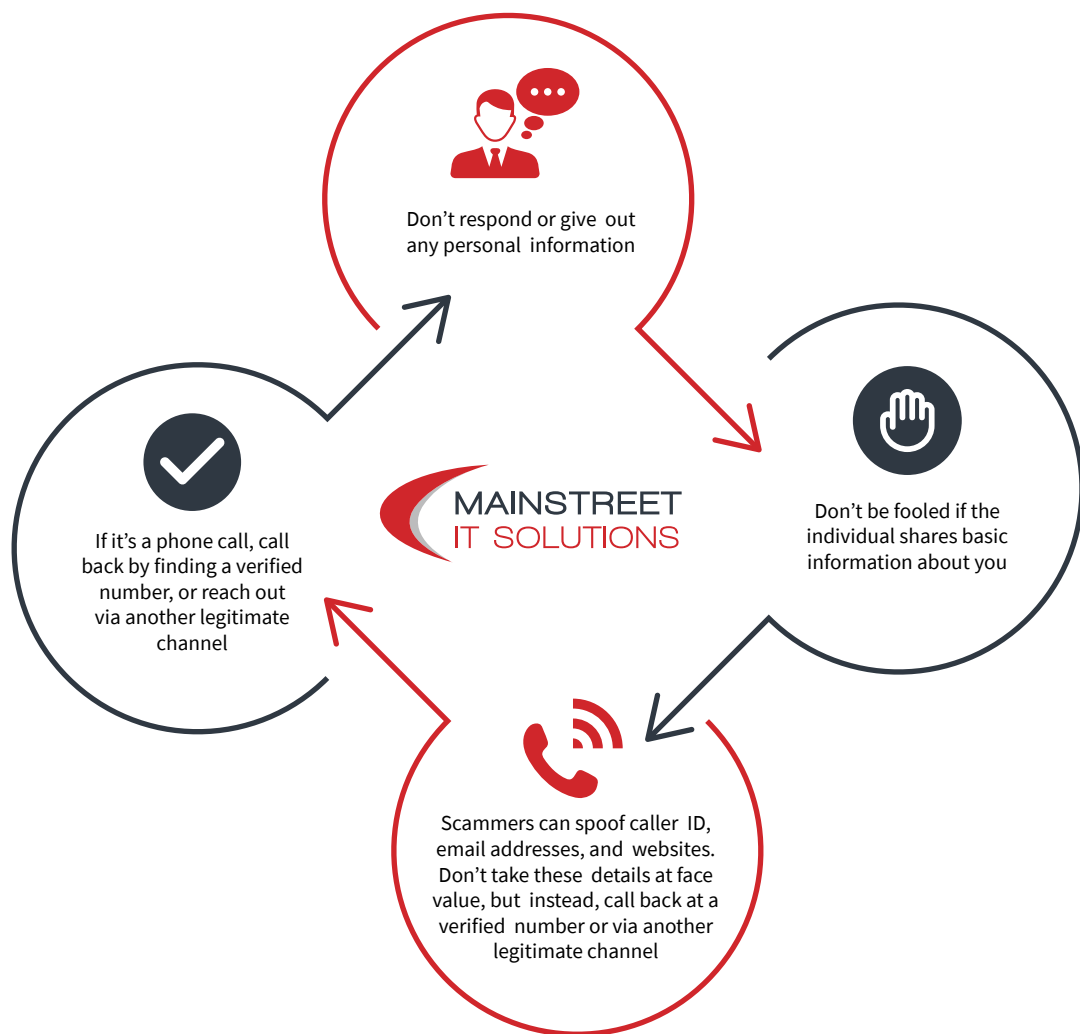

Ask yourself if you were expecting the attachment

### MESSAGE

Look for misspellings, generic greetings and requests to take action

## Received an unsolicited call, text, or email?

## But they sound so... real!

That is the goal! Scammers have become incredibly convincing and know that good customer service and attention to detail help sell their story – but don't get caught up. If it sounds suspicious or too good to be true, trust your instincts!
